

HYDRO FORCE™ 138

Shutoff

Overview

back-pressure device. Engineered for a 75 psi inlet pressure, it maximizes hose performance while maintaining nozzle pressure between 45 to 50 psi across all 1.75-inch handline hose types. This configuration delivers a targeted flow of 175 GPM at 45 psi nozzle pressure, resulting in a manageable 60 lbs nozzle reaction force.

Specifications

	IMPERIAL	METRIC
Waterway Size	1.375 in.	35 mm
Rated Pressure	200 psi	14 bar
Weight	2.9 lbs	1.3 kg
Length	5.2 in.	132 mm
Width	4.1 in.	104 mm
Height	5.2 in.	132 mm

Features

- Full-ball design maintains stream quality when baled-down
- Lightweight
- Hard-coat anodized aluminum body and all-metal ball
- Inlet Threads: 1.5" NH, 1.5" NPSH
- Outlet Threads: 1.5" NH, and 1.5" NPSH
- Full-time swivel
- NFPA 1964 compliant
- 5 Year Warranty
- Pistol grip available
